

CANOPY SIZE CHART

1: FIND YOUR WEIGHT 2: FIND YOUR EXPERIENCE LEVEL 3: FIND YOUR MINIMUM CANOPY SIZE

To allow for the use of ancillary equipment such as cameras, weight belts, daily fluctuations in weight and difference in canopy manufacturers sizing jumpers are allowed up to a 10% variation in the stated canopy size. Form 330 is a standard minimum & not an automatic allowance. Skydivers wishing to downsize should discuss their options with their CI and should only downsize up to 15% smaller than their current canopy at any one time. Regardless of any information the chart, jumpers should not exceed the manufacturers recommendations for use of that canopy. Once you have reached 2000 jumps you are responsible for the selection of your canopy size, please always seek advice from your CI.

Please refer to additional charts if you have completed a recognised canopy course and/or CT2, CT3, CT4

		JUMP NUMBERS
